Semester Long Project

1. The project will be individual. This means that every student will work alone.

2. Every student should select either the standard project or a personalized project.

3. If a student selects the personalized project she/he should submit a one page proposal by September 30. Furthermore if she/he is in a thesis option program, she/he should get the approval of her/his thesis supervisor.

4. The standard project will be on-line by September 30

5. Validation (e.g. prototyping, simulation) is mandatory for all projects, i.e. surveys/literature review projects will not be accepted

6. All projects should be related to cloud computing

The End
