

On The Semester Long Project

Roch Glitho, PhD

Associate Professor and Canada Research Chair

My URL - <http://users.encs.concordia.ca/~glitho/>

Semester Long Project

1. The project will be individual. This means that every student will work alone.
2. Every student should select either the standard project or a personalized project.
3. If a student selects the personalized project she/he should submit a one page proposal by September 30. Furthermore if she/he is in a thesis option program, she/he should get the approval of her/his thesis supervisor.

Semester Long Project

4. The standard project will be on-line next week

5. Validation (e.g. prototyping, simulation) is mandatory for all projects, i.e. surveys/literature review projects will not be accepted

5. All projects should be related to cloud computing

The End
