The aim of the Concordia Summer School is to bring together well-known researchers, from academia and industries, to present and discuss the state of the art and their recent achievements in Telecommunications Software Engineering. This school is an opportunity to bring together for the first time in Montreal distinguished researchers, professors, and graduate students working in this topic. This is an opportunity for new comers and graduate students to learn the state of the art and the achievements in this discipline.

The Summer School will be held from August 26 to August 29, 2002, in the city of Montreal.
