

# Gilles Desharnais

Axis Prototypes, SME Certified Master in Rapid Technologies & Additive Manufacturing

## Additive Manufacturing: Key Element of the 4th Industrial Revolution

Gilles Desharnais is an electrical engineer and MBA from Concordia University. He is among the pioneers of additive manufacturing in Canada since the late '90s, and has developed a strategic perspective on the uses and development of rapid prototyping and 3D printing applications and technologies. Gilles is certified at the master level by the SME (Society of Manufacturing Engineers) in Rapid Technologies & Additive Manufacturing. He will present a brief overview of the history of additive manufacturing and its evolution over time, and provide his perspective on how this technology can evolve to be a key element of the 4th industrial revolution.
