

COMP 333 — Week 1 Welcome

Welcome to COMP 333 Data Analytics

Welcome to COMP 333.

My name is Greg Butler, and you can contact me at gregb@cse.concordia.ca

The TAs for the course are (TENTATIVE) Hamed, and Sima.

Note that labs start on next Wednesday (Week 2).

This is in-person on-site course COMP 333

but be prepared to switch to remote mode, if necessary!

Expect to spend about 10 hours per week on COMP333.

It is important that you have access to internet and appropriate computer hardware (computer, webcam, microphone) and the ability to do online timed exams.

It is important that you do each and every lab
and submit the lab exercises and the lab assignments
as this is how you will learn the skills with the Python tools.

It is important that you do each and every quiz
both the self-test quizzes (which are not counted towards marks)
and the actual timed quizzes (which do count towards marks)
as these provide feedback on your knowledge gained from lectures and labs.

In Week 1 (this lecture) we will cover

- ▶ Data Analytics in a Nutshell to provide an overview.
- ▶ Course Outline which you should read very carefully.
- ▶ COMP333 Guide on getting the most out of the course.

All the best, Greg.
